Ongoing Research Projects

Examining The Relationship Between Social Media, Beauty, Fitness, and Health Among Young Women in the US
The purpose of this study is to examine how young adult women's social media use influences their perceptions and behaviors specific to physical and mental health and how this relationship influences exercise behaviors. A pilot study (n=86) has been conducted with quantitative results submitted for peer-review publication. Qualitative data is being analyzed for dissemination.

An exploration into adult women's relationship with physical activity engagement and "fit" ideal body image beliefs mediated by sociocultural factors: a US/Italy cross-cultural comparison

The objective of this multi-phase mixed-methods study is to cross-culturally explore Italian and US adult women's relationships with exercise engagement and fit ideal body image beliefs, mediated by sociocultural factors in tandem with the lived experiences that impact this relationship. I am lead investigator with established collaborators at Pennington Biomedical Research Center and Universita di Bologna. Outcomes will be supplemental funding streams, publications, and conference presentations.

A comparison of exercise beliefs and experiences among prenatal and postpartum Latina, Black, and non-Latina white women in the US

The purpose of this study is to examine and compare Latina, Black, and non-Latina white women's beliefs and experiences toward pre and postpartum exercise. This mixed-methods study has been conceptualized with funding mechanisms sought. Deliverables will be scaled-up funding awards, publications, and conference

presentations. I am the lead investigator.

Feasibility of the Women Exercising: Active, and Learning Together for Health (WEALTH) Trial

I am co-I for this exercise intervention trial. I am leading the qualitative inquiry and intervention instruction. The aim is to scale-up the intervention with additional funding awards and disseminate papers based on this trial.

TEACHING EXPERIENCE

Academic Appointments

Louisiana State University – School of Kinesiology Assistant Professor	Baton Rouge, Louisiana Fall 2023 – Present
Indiana University School of Public Health – Applied Health Science Adjunct Faculty	Bloomington, Indiana Fall 2020 – May 2023
Indiana University School of Public Health – Applied Health Science Associate Instructor	Bloomington, Indiana October 2016 – May 2020
Indiana University School of Public Health - Kinesiology Assistant Instructor	Bloomington, Indiana August 2015 - December 2019
Indiana University School of Public Health – Applied Health Science Graduate Assistant Instructor	Bloomington, Indiana Fall 2018
Indiana University School of Public Health – Applied Health Science Teaching Assistant	Bloomington, Indiana January 2015 – May 2015

Courses Taught

Note: Approximate enrollment numbers listed

Louisiana State University – School of Kinesiology

KIN 4520 – Psychosocial Aspects of Physical Activity

Spring 2024, 45 undergraduate students

KIN 7574 – Qualitative Research in Kinesiology

Spring 2024, 40 online graduate students

KIN 4520 – Psychosocial Aspects of Physical Activity

Fall 2023, 45 undergraduate students

KIN 7574 – Qualitative Research in Kinesiology

Fall 2023, 45 online graduate students

Indiana University – Bloomington, Department of Applied Health Science

H236 – Personal Health

Fall 2022, 110 online undergraduate students

H305 – Women’s Health

Spring 2022, 125 online undergraduate students

Hadfield – CV

H180 – Stress Prevention & Management

Spring 2023, 150 online undergraduate students
Spring 2022, 160 online undergraduate students
Spring 2021, 150 online undergraduate students
Fall 2020, 100 online undergraduate students
