Please answer questions below, provide source and amount of proposed cost sharing and attach justification. University-contributed cost-sharing and matching funds are normally budgeted in the following cost categories: salaries, wages, and related fringe benefits and facilities and administrative costs. Cost sharing can also be in the form of unrecovered indirect costs (via reduced or waived indirect costs on requested funds). Other types of cost sharing contributions may be used when they can be identified unambiguously in the University's chart of accounts.
